Extracts from the second report of Professor Otto, successor of the medical board, chemists, &c. &c. &c.

"It seems that no other acid than that procured by the distillation of ten parts of saltpetre, and six parts of oil of vitrol, will confer upon raw cotton its explosive power. Hydrate of nitric acid (saltpetre) dissolves the cotton. In good proper order the cotton becomes transparent, and the fibre is not injured or dissolved. The acid by distillation first procured is best. Cotton dipped into it for half a minute, and then quickly pressed between glass plates, or boards, and washed afterwards until it is free from acid, and subsequently dried, produces a superior exploding article. Using the acid a second time, an inferior article is made; but if after having been washed and dried it is again dipped into the acid, it becomes excellent. A repetition of the manipulation necessarily augments the exploding quality. Cotton may even remain in the acid longer than a half a minute. That which has laid in it as long as twelve hours was found to be very explosive. It is important that the cotton be well washed when it is taken out of the acid; for if any remains in it, a saltpetre flavor will attach to it when dry, and when exploding will leave on anything white an acid tincture. The vivid explosion of a small ball of the article, on a white china plate, is the criterion to test its good quality by. It must flash like gunpowder, and leave no dust behind it. If a particle even is seen it cannot be used in guns. It also appears to be necessary that the cotton, after having been dipped into the acid and pressed, be immediately put into a large quantity of water. If the cotton be put into an insufficient quantity of water, it (the cotton) gets heated; and small quantities of cotton are also preferable; for, if large, it forms into knots of a bluish-green color, which are so firm, as not to be easily loosened. The more the prepared article resembles the one in its natural state, the better and more powerful it is. With 5-4ths or 6-4ths of a grain—480 grains equal to an English ounce—balls of one-half an inch diameter were driven through boards one inch thick. With 6 grains a bullet was driven from a rifle, at a distance of 45 steps, into an oak plank, to the depth of an inch; and with four or five grains, effectual shots have been made with fowling-pieces. The more readily the cotton explodes, the greater the care to be taken in handling it."

Professor Shonbein, at an experiment made in presence of one of the editors of the Times, tested some gun-cotton which had been immersed in water sixty days, and found it as good as when perfectly fresh, after having been dried.

FRIDAY MORNING, NOV. 13.

TELEGRAPHIC.

Yesterday at 2 p. m., a fair business was done in Stocks at Philadelphia. U. S. 5's, steady. Flour market unsettled—prices declined. Fresh ground, Pa. brands sold at \$5.50. Corn meal declined 12 1/2 cents per bbl. Sales of prime red wheat at 109 cts. Yellow corn 69 cents.

At New York yesterday, 2 p. m., cotton had gone below last week's prices 1/2 cent. Flour dull—some sales at \$5.87 1/2. Wheat inactive. Corn heavy, and depressed. The returns of the election give the whigs in New York Assembly 72—democrats 56.

We are indebted to the Baltimore Patriot for these items.

At Baltimore yesterday, Flour went back to \$5.50, at which 2500 bbl. were sold. Rye flour \$4.25.—Corn meal \$3.75. Supply of flour moderate. Prime Maryland red wheat 100 to 112c—inactive. White wheat for family flour \$120 to 125. Sales of 700 bushels. Sales of Pa. wheat have taken place this week, to the amount of 30,000 bushels at prices higher than can now be gotten. Hams 7 to 8 cts. Lard 7 1/2 cts.

Tharp (dem.) is elected Governor of Delaware, by 169 majority. Houston (whig) elected to Congress by 14 majority.

MASSACHUSETTS.—The full returns give the Whig candidate for Governor a majority of 6,733. To the Senate 17 Whigs are certainly chosen; 12 are in doubt; no choice in 3; 3 districts, probably Whig, are to be heard from.

To the House, 150 whigs, 86 democrats, and 3 Liberty are elected.

Mr. Winthrop's election was opposed by all those who are opposed to the Mexican war, on account of his vote in favor of the bill furnishing supplies to the army. He is elected notwithstanding by a majority of 3,653.

THE LOAN.—The proposals for the five million loan were opened yesterday. We understand that the whole amount was subscribed for at par.

We have determined upon the most mature reflection not to publish Mr. Savage's letter, believing that the uncalculated severity of its language is calculated to wound the feelings of those of whom it speaks, as well as to do injury to the cause of Temperance. We are not only the advocates of abstaining from the use of intoxicating liquors, but also of abstaining from the use of intemperate language in our intercourse with our fellow men.

The St. Louis New Era says that the Rev. John N. Maffit is expected to be in that city soon.

HIGHLY IMPORTANT! A WEEK LATER FROM MEXICO.

Determination of the Mexicans to rally around SANTA ANNA!

The New Orleans Picayune of the 5th instant, for which we are indebted to a gentleman of this city, states that it has seen a letter from Vera Cruz of the 7th of October, a week later than any other intelligence received in New Orleans from that city, having been brought by the U. S. store ship Relief, which had arrived at Pensacola, on the 30th ult, in nineteen days passage.

The purport of the letter is important.

It says, that the news of the fall of Monterey had been received by the government of Mexico, and was known to the people of that city, and that it did not seem to shock the public mind to the extent anticipated. On the contrary, the effect was rather to aggravate the bad passions already aroused against our country.

Further, that Santa Anna had just arrived at San Louis Potosi when the Courier from Monterey passed that place to Mexico, that he had only \$27,000 in the Military Chest, having failed to raise more than that sum from the Church, that the people of Mexico had such faith in themselves and their chief, as to be entirely confident of his ability to rally them around him, and equip an army which will destroy any force that we can send against them—that overweening vanity and self-esteem, which no reverses can overcome, animated the whole population.

The letter which the Picayune has seen expresses the most unlimited confidence of the success of the Mexican arms. This corroborates the view we have taken in another column.

The Picayune makes some just remarks upon this state of feeling in Mexico, and hopes that our government will hereafter put forth its might with such energy, that the next blow will crush the enemy.

THE CAPITOL. Important improvements have been made in this building, among which we notice the erection of a furnace in the basement of the north wing for the purpose of warming the Senate Chamber with heated air, and the enlargement of the Law Library to nearly double its size last session. Vanderyn's new picture is expected to be in its place in one of the vacant panels of the Rotunda by the 25th of the month at farthest.

The walls of the main building, fronting on the two court yards have been repainted—an improvement that was greatly needed, and the Committee Rooms have all been over-hauled and thoroughly cleansed. The Hall of Representatives and the Senate Room remain as they were, only that the furniture has been renovated. We are glad to see that the shed which concealed the Statue of Washington from view has been removed. A staunch iron railing is to be put up around it in a few days to keep away the destroying fingers of our youth.—The grounds about the Capitol have all put on their winter garments, and the whole appearance of things hereabouts is very different from what it was a few weeks since.

The supplies of vegetables, game, and fresh fish continue to be very scant and the quality of such as in market yesterday morning was even worse than usual. Delicacies are almost out of vogue,—there being only here and there a show of them and that at exorbitant prices. Butchers' meats are abundant and of excellent quality. Flour for family use has fallen back to \$7 a barrel.

We call attention of buyers to the sale at Mr. Dyer's Auction Rooms this morning at 10 1/2 o'clock of Teas, Coffee, Tobacco, Cigars, &c. &c. Also to the fine lot of new furniture on sale at the Auction Rooms of A. Green.

We call the attention of housekeepers to the card of Mr. Milburn in another column. They will find every variety of furniture at every variety of price to suit the times.

Two more steamboats the Monarch and the Metamora have been destroyed by the same snag in the Mississippi river just below Memphis.

Mr. Cushing late Minister to China, says the St. Louis New Era, has returned to the East from his visit to the St. Croix where he is concerned in the pinneries saw mills &c.

Dedication. The new Odd Fellows' Hall at Frederick, Md. is to be dedicated on the 17th. The Herald says:

"We have every assurance that a large and splendid turn-out of the order may be expected. Many of the brethren from Baltimore and elsewhere will be present on the occasion, and if the weather be fair, it will be to the citizens of Frederick, but more particularly to the Odd Fellows, a day full of interest and one long to be remembered."

West's great picture of Christ Healing the sick is now being exhibited at Charleston, S. C.

Mr. Joseph Ricardo while out upon the bay at Charleston, S. C., on the 9th instant, employed in shooting, accidentally discharged the load into his arm which, in consequence, had to be amputated at the elbow. He is now recovering.

A city friend informs us that the Baptist Church on E. street, under charge of Rev. Mr. Sampson has determined to admit no one as a member of that church who drinks or traffics in ardent spirits as a beverage.

Gen. Lamar has been appointed by the Governor of Texas Civil and Military Governor of the Texas Frontier. Laredo is to be his head quarters. He is to have 100 troops under his command.

The Cumberland Iron and Coal mongers intend to send a delegate to the convention about to assemble this winter in our city for the purpose of endeavoring to get the tariff of 1846 on coal and iron changed.

The St. Louis Republican says that Gen. Kearney is a Democrat, not a Whig.

We learn that Mr. Wales, one of the Police Officers of the Capitol, is the only officer who has been removed by the new Commissioner, Mr. Beaumont. Mr. Gaither, of Maryland, takes Mr. W.'s place.

FROM THIRMY OF INVASION.

Our advice of the Army of Invasion are up to the 13th of October. The War Department says, the Union not yet received the official account of the battle of Monterey in detail, but is in possession of the Commander-in-chief of the 6th, 11th, and 13th ultimo. The reason why the dead accounts of the battle have not been sent was owing to the delay of the subordinate officer making their returns to Headquarters. The Orleans Picayune however, of the 4th instant, publishes a complete list of the officers killed and wounded, which should have appeared in the D. F. Fountain yesterday morning, but for the fact of our exchange with that excellent journal has yet come to hand. In another column we republish from the Baltimore Clipper, a list of the killed and wounded in the Baltimore Battalion. The Picayune list may be regarded as official having been sent out on the spot by its industrious correspondents.

The movement of the Army of Invasion, from the time of the capture of Monterey up to the 13th of October, is not very important. We learn from the Union that the letters of General Taylor of the dates abovementioned, are brief, and comparatively devoid of interest. All the intelligence communicated hitherto has been laid before the public, and we await the tidings from Monterey, in the hope that we shall be able to lay it before our readers, on the event of the day they shall arrive.

From a careful perusal of all the accounts from the seat of war, I think we are not far out of the way, in coming to the conclusion, that a severe conflict is in reserve between the opposing armies. No man now doubts about the disposition and determination of the Mexicans to fight. If they do not resist us hereafter, it will be because they have changed their tactics. Santa Anna is now at the head of the Mexican Army, and will have taken profitable lessons from the rests of the contests of Palo Alto and Monterey. We have no fears of a change of fortune in their war and against us, let them do what they may, for General Taylor is equal to any emergency. But it should be borne in mind, that Santa Anna counts himself to be the Napoleon of the Western Hemisphere, and that vanity is the most conspicuous trait in his character. It will not be difficult for such a man to imagine himself equal to the task of defeating the American General, and hence we cannot resist the conclusion that he will give battle to the Army of Invasion. At what point the resistance will be made, is, of course a matter of conjecture, for Santa Anna's movements will necessarily be regulated by those of Gen. Taylor. If our Army moves upon Saltillo, we predict the great battle will take place at that town, or upon the road leading to it. The rumor about his concentrating the Mexican forces at San Louis Potosi, we consider as a mere ruse de guerre, as the sequel will show. But we repeat that we have the utmost confidence in Gen. Taylor's Generalship, and if Santa Anna hazards a battle with him, we believe the Mexicans will be vanquished and totally routed.

A writer for the New Orleans Bee writing from Matamoros asserts, that a number of vessels seen lying on Brazos, for more than a month unboarded, at \$100 per day for their detention, and enumerates among others the ship Burmah, which he says arrived on the 9th of September, and whose cargo was still on board, on the 25th of October.—If this be so, there must be negligence somewhere.

YUCATAN. There has been another revolution in this province of Mexico. So they go—suffering under the constant rule of minorities.

COL. STEVENSON. The Union of Wednesday evening says that Col. Mason, who has gone to California, will rank Col. Stevenson, who is only Colonel of his regiment, but that Gen. Kearney will assume the command when he reaches the Pacific Provinces.

It seems that Mr. Von Schmidt, of our city, is the inventor of gun-cotton, prepared differently from that of the German chemists.

MISSING VESSEL.—The brig Rebecca, of the port of Philadelphia, says the Ledger, sailed on her homeward voyage from Port of Spain, Trinidad, on the 8th of September last, since which time there has been no tidings of her, and the fears of those interested are that she has been lost at sea, and that all on board have perished. There are hopes, however, that the crew and passengers may have been taken off the wreck by an outward bound vessel, in which way alone can the absence of tidings from them be accounted for.

The Rebecca was owned by Mr. Michael Molloy, whose son was on board as second mate. It is also understood that there were about fifteen passengers, principally natives of the Island of Trinidad.

The Rebecca having sailed on the 9th of September, must have been exposed to the gale which prevailed on the 14th, 15th, and 16th of the same month.

ANOTHER. A letter received at the Philadelphia Exchange, dated Puerto Cabello, Oct. 20, states that serious apprehension are felt for the Baltimore brig Constitution, Capt. Lauderman, which left that port in August, destined for Laguya and that place. No accounts have been received there in reference to her.

At a late fair in Lewis county, Pa., a premium was awarded as follows: "Best Comforter, Miss Harriet Sheldon."

CHILDREN. The number of children born in the United States in a year is about 450,000. It is calculated that only one half live to be twenty-one years old.

A CRASH. A new brick building on 13th street, Philadelphia, belonging to Mr. James Buist, brother to Mr. Buist of this city, fell down at 3 o'clock, p. m. on Tuesday, with a tremendous crash. One of the workmen had been employed on the very spot where death would have met him but a moment before.—A painter also was in the building but escaped in time to save himself.

Sheriff Lelair, (native) recently elected in Philadelphia has appointed several democrats to offices under him, whereupon the whole native party is in commotion. An indignation meeting is talked of.

Com. Sloat. We are indebted to the New Orleans Jeffersonian for the following interesting incident: "On yesterday, Dr. Hawks officiated in Christ's Church, after an absence of several months. During the reading of the service a prayer was introduced on behalf of one who desired to render thanks to God, for his escape from the perils of the sea. On turning around, we discovered Commodore Sloat most devoutly pouring forth his thanksgivings. The old veteran was not ashamed to confess before men, his deep obligations to "Him that rides on the whirlwind and directs the storm." May our country be forever blessed with commanders who fear the Lord."

ANOTHER HOT CASE.—The New York Sunday Chronicle says, (we copy from the Albany Knickerbocker of the 10th instant.) "That great excitement has existed within the last few days in Syracuse, occasioned by the seduction of a very beautiful woman, Mrs. S—, by a person calling himself Lieut. Llewellyn Jones, U. S. A. And we are told by a gentleman from that place, that if this person had not made his exit in a very great hurry, that probably measures as harsh would have been taken with him as were taken with the broker, Hoyt, in Richmond, Va.

That an officer of the United States would be guilty of such outrageous conduct, we cannot for a moment believe, and therefore come to the conclusion that this fellow is some impostor, who has assumed the above name to accomplish his infamous purposes. The utmost distress prevails among all the friends of the lady, and a gloom has been thrown over every branch of the family.

We find that there is a Lieut. Llewellyn Jones in the Army—having been appointed by Mr. Marcy to the new regiment of riflemen, we believe. But it is impossible that it can be him; and we do not know any other of the same name. But if we remember right, there was a Mr. Llewellyn Jones, who was connected with the Oswego Bank, at the time of some delinquencies there. And there was also a Mr. Llewellyn Jones, who was connected with some curious transactions as naval storekeeper at Rio Janeiro.

Now, it is out of the question that either of these persons can be the officer in the army before named. And we therefore call on Mr. Marcy to institute a searching inquiry into this matter, with a view of ferreting out every thing connected with the transaction, and exposing whatever imposture there may be about it. This is demanded immediately by the public."

LIST OF KILLED AND WOUNDED. The N. Orleans Picayune of the 4th inst. gives the following list of killed and wounded in the Baltimore Battalion at the battle of Monterey:

For the Daily Fountain.
ALEXANDRIA, VIRGINIA,
November 12th, 1846.

The Sons of Temperance are making preparations for their anniversary celebration on the 24th. Two Divisions from Georgetown are expected to unite with Harmony on the occasion.

Intelligence was received here yesterday that the schr. Dodge, Capt. Knapp, one of the New York packets, has been wrecked off Cape Henry. She is freighted with merchandise for several of our enterprising citizens, and I have no doubt some of your merchants will be losers also.

The intelligence I gave you yesterday with regard to our election proved correct; but few votes being polled in opposition. George W. P. Custis, Robert Brockett, and Francis L. Smith, Esqs., will therefore be our representatives before the Legislature next winter.

I see you allude to the probable division of Fairfax county with a view to the attachment of a portion of its territory to ours. Such a scheme of annexation is certainly on foot among the people of that portion of Fairfax, but it receives but little attention here, it being a matter which concerns our Polick friends only. It will certainly be to their advantage, and it seems to me that the opposition of the Providence folks is altogether of a selfish character.

FLOUR AND GRAIN IN ALEXANDRIA.—The Gazette gives the following, viz: Monday and Tuesday there were sales of 500,000 bbls. from stores at \$5.62 1/2. Yesterday the market gave way, and we believe \$5.50 was as much as could be obtained, though we heard of no sales. Wagon price unsettled.

The grain market opened yesterday morning rather dull, and prices were a shade lower. Sales of fair red wheat are made at 100s 105cts. from vessels—the wagon price is about the same.

We note sales of prime white corn at 67cts. No sales of yellow.

Friend Peter Mepikin informs us that Miss Nancy Ashton, who, by the by, has sworn an everlasting hatred to cold water, and eternal fidelity to her favorite beverage whiskey, was brought to the watch house on the night of the 11th, for being rather noisy in the street, and from thence as a matter of course, to the work house.

There is a man in Massachusetts whose name is Isaac Fiskie. He spells his name thus: 'Eyezurk Phyaque.'

A sword is to be presented to Lieut. Saml. C. French, of New Jersey, who has distinguished himself in a gallant manner at Monterey.

Reported for the Fountain. CIRCUIT COURT.

Thursday, Nov. 12, 1846.—In the case of Guista vs. Lawson, the jury returned a verdict for the plaintiff—damage one cent.

The following cases were tried to-day.
Richard Dement, administrator of Jane C. Claggett, vs. Lawrence Harman—Verdict for plaintiff for \$62.20.

Eleanor Jones vs. James H. Fowler—Verdict for plaintiff for \$55, with ten years interest. Carlisle for plaintiff; Bradley for defence.

Walter Stewart vs. Thomas Carberry; and Wm. Blanchard vs. Same.

These two cases are brought to recover damages sustained by the plaintiffs in consequence of the defendant having torn down a party wall, and leaving the premises of the plaintiff exposed for considerable time. Carlisle for plaintiffs; May for defendant.

On the 22nd of December—next month—the French government will receive proposals for the supply of 3,700,000 kilogrammes of Kentucky tobacco, and on the 22nd of January, 1847, for the supply of 2,650,000 kilogrammes of Maryland tobacco, and of 1,800,000 kilogrammes of Virginia tobacco. All this tobacco will be carried to France in American vessels. This privilege was obtained by the interference of our late Minister, Mr. King.

A deck hand of a Western steambot was recently discharged by the mate and warned never to come on board again. He disobeyed the warning, and while the boat was lying at Pittsburg, a few days ago, visited her, whereupon the mate seized a capstan bar, and killed him!

They write from Monterey that Gen. Worth refused permission to publish a newspaper in that city in English, on the ground that it was contrary to the wishes of the American government.

One of the rumors by the last mail from Monterey was, that Santa Anna had issued a proclamation announcing that he should not rest till he planted his one foot on the banks of the Sabine, and calling on his countrymen to follow his lead.

If it be true that an attack headed by Com. Conner in person, was to be made on Alvarado on the 12th of October, it will not be long before we shall have the particulars of this affair.

That very excellent paper the New Orleans Bulletin has changed editors, Mr. W. L. Hodge taking the place of Mr. W. Jones. Mr. Hodge has the reputation of being a forcible and clear commercial writer.

Commodore Turner the new Commandant of the Portsmouth, N. H. Navy Yard, has entered upon his duties.

Quite a serious row occurred on St. Mary's street, Philadelphia, on Monday afternoon, between several colored men, one of whom was shockingly beaten and bruised.

Gen. Vega is soon to leave New York for his country, having been exchanged for Com. Carpenter.
